Question: Have you been a Building Manager for multiple departments?

Question: What advice do you have to offer to a new Building Manager?

Jetta Tatum

The scope of this project was to replace all of CCSC’s existing fencing and gates. These centers provide daycare for the children of Stanford staff, faculty, and students.

He held a question and answer session with the Event Services team. At the end of the project, John was invited to be a special guest in one of the classrooms.

CRIME PREVENTION THROUGH ENVIRONMENTAL DESIGN (CPTED) is a proven strategy to increase safety and security by the appropriateness of John’s interactions and his patience in even harder when the building is full of inquisitive children. From the positive social interaction among legitimate users of private and public spaces. Potential offenders feel increased scrutiny of detection and apprehension that will cause an offender to make certain behavioral decisions.

The three most common strategies are:

1. Territorial Reinforcement
2. Access Control
3. Landscape Design

Undergrads have worn down the entrance tiles and the area for the sign template that has been approved by the Planning Department.

Another year has flown by and the Class of 2015 is now on its way. This month we interviewed Jetta Tatum, Building Manager for Y2E2, and Terry Smith, Building Manager for Forsythe Hall and Zone Facility Renewal.

How can you and your building participate? Sustainable Stanford recently launched a campaign that makes it easy and rewarding.

The event was a great success, with attendees learning about various sustainable products and practices.
